# Scottyab/rootbeer Executive Summary

Kristy Nguyen

CS 472 -1001

## Languages

The project is mainly coded in Java with 67.4%, then in Kotlin for 24.0%, and finally in C++ for 6.9% with a little bit of C and CMake.

## Useful Git Commands

The most useful git command I have used in this lab was `git status` because it allows you to see what files were modified, deleted, added, or untracked changes.
