# Scottyab/rootbeer Project Summary

By Zach Conlin

Timeline and Contributions

This project was completed over 307 weeks, with the first files being touched on the week of 06-26-2015 and the last touch on the week of 11-16-2021. From the data generated by mining the repository, it appears that Scott Alexander-Bown and Matthew Rollings contributed the most while developers such as grubeli and Fi5t only touched a file once.

Project Makeup

This project is mainly coded in Java, comprising 67% of the total project, followed by Kotlin at 24% and C++ at 6.9%.

Useful Git Commands

The most useful git command I have used in this lab was git branch as it serves as the basis for the change tracking and version control that git is used for.
